

LEED RATING SYSTEM

Fritztile is a combination of resin, recycled glass and recycled aggregates.

The following percentages of pre consumer and post consumer waste by Product Series of Fritztile:

RGlass Series

- Post Consumer Waste / Recycled Glass: 10% total weight
- Pre Consumer Waste / Recycled Aggregates: 65% total weight

Natural Quarry Series

- Pre Consumer Waste / Recycled Aggregates: 75% total weight

Classic Terrazzo

- Pre Consumer Waste / Recycled Aggregates: 75% total weight

The following are areas where Fritztile may contribute to achieve LEED credits:

MATERIALS & RESOURCES

MR4.1: Use materials with recycled content such that the sum of the post-consumer recycled content plus 1/2 pre-consumer content constitute at least 5% of the total value of the materials in the project. (1 point).

MR4.2: Use materials with recycled content such that the sum of the post-consumer recycled content plus 1/2 the pre-consumer recycled content constitutes at least 10% of the total value of the materials in the project. (1 point).

INDOOR ENVIRONMENTAL QUALITY

IEQ4.1: The VOC content of the adhesives and sealants used must be less than the current VOC content limits of South Coast Air Quality Management District Rule #1168 and all sealants used as filters must meet or exceed the requirements of the Bay Area Air Quality Management District Regulation 8, Rule 51 (1 point).

All Fritztile Adhesives and Floor Care Products meet or exceed the above requirements. MSDS available upon request or can be viewed at www.fritztile.com.

IEQ4.3: Reduce the quantity of indoor air contaminants that are odorous, potentially irritating and/or harmful to the comfort and well-being of installers and occupants. (1 point).
